

Manual de instalación de NetBeans

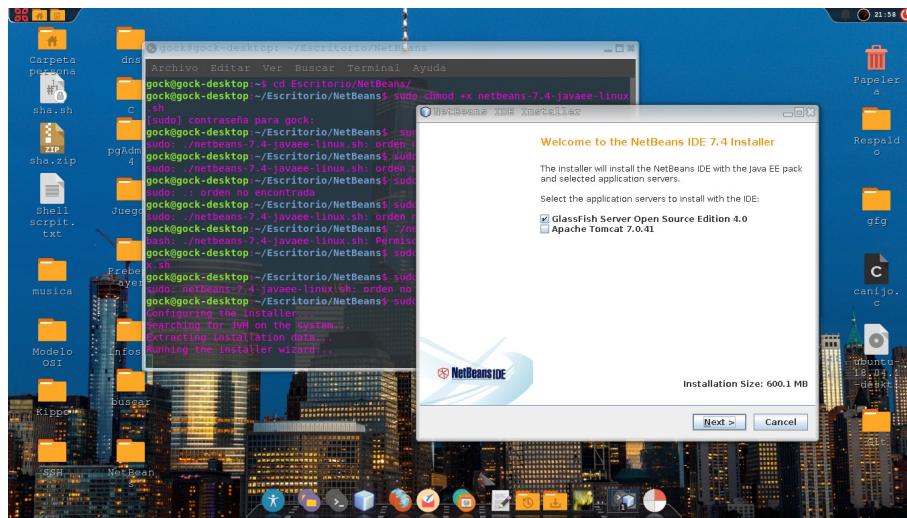

****Antes que nada se debe tener instalado una versión de java****

1. Ir a la página oficial y descargar el archivo **netbeans-7.4-javaee-linux.sh** en <https://netbeans.org/downloads/7.4/index.html>

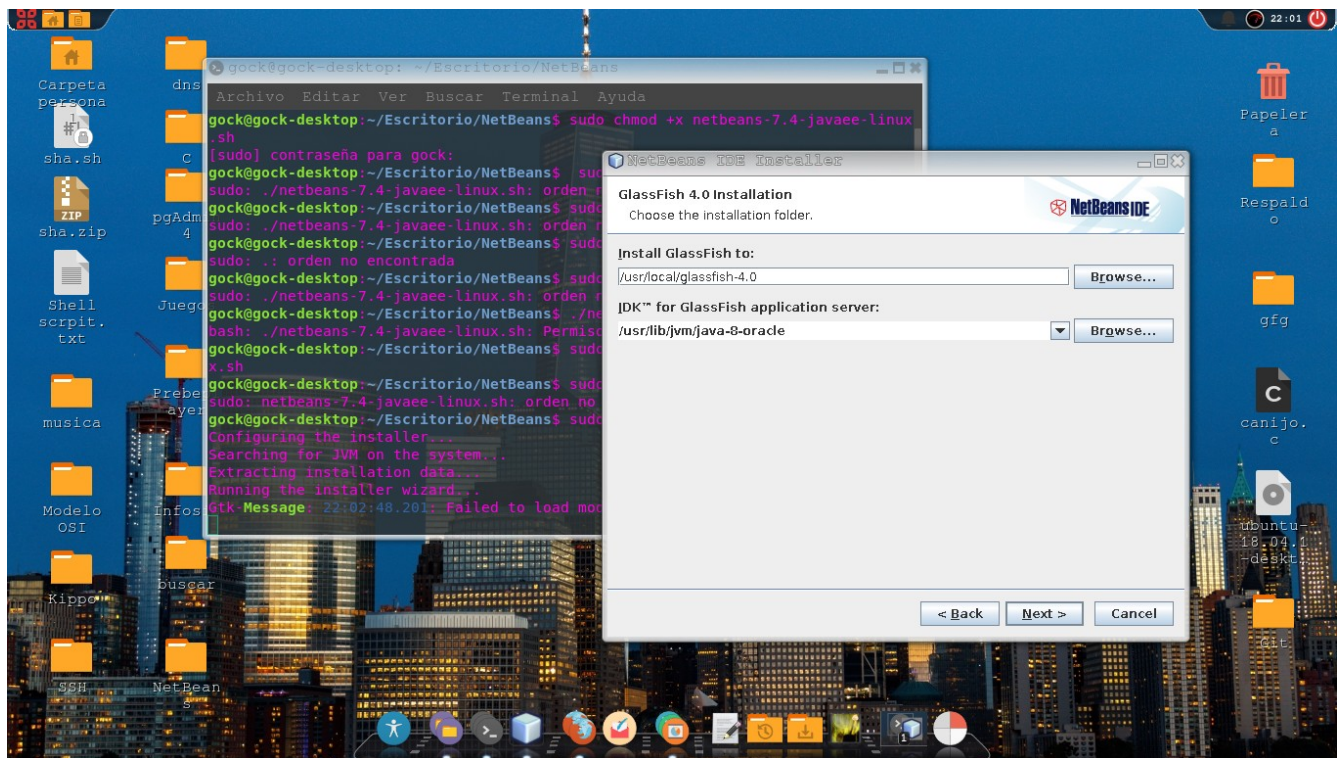

En este caso JAVA EE

2. Luego desde la terminal nos colocamos en la carpeta donde lo descargamos, y le damos permisos de ejecución con “`sudo chmod 777 netbeans-7.4-javaee-linux.sh`” y a continuación lo ejecutamos con “`sudo ./netbeans-7.4-javaee-linux.sh`”

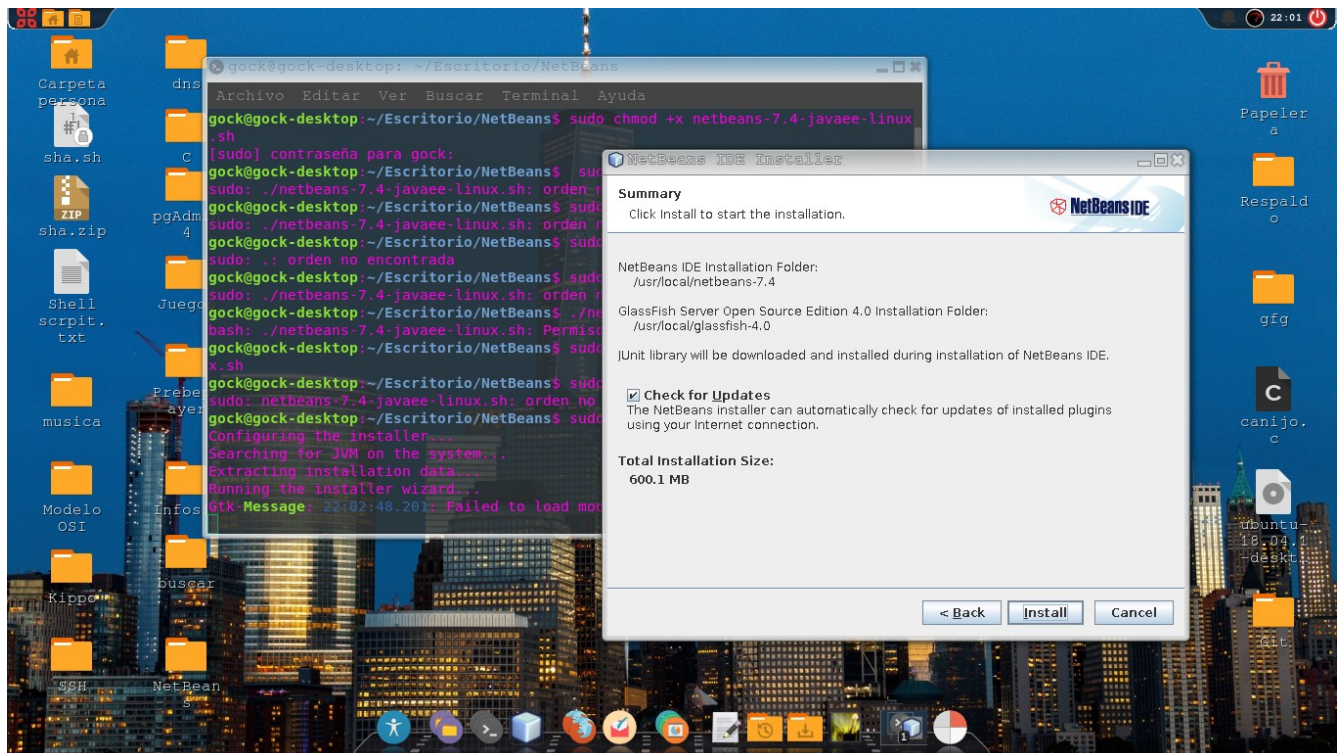

-
- The screenshot shows a Linux desktop environment with a cityscape background. In the foreground, there are two windows:
- Terminal Window:** Displays the command-line installation process for NetBeans IDE 7.4. The user is in the directory `~/Escritorio/NetBeans`. The terminal shows the execution of `cd`, `chmod +x netbeans-7.4-javaee-linux.sh`, and the running of the script. It prompts for a password and shows the progress of the installer, including searching for JVM, extracting installation data, and running the installer wizard.
 - NetBeans IDE Installer Window:** Shows the 'License Agreement' screen. The title is 'NetBeans IDE Installer'. The main text is the 'NETBEANS IDE 7.4 ("Product") LICENSE AGREEMENT'. The agreement text is visible, starting with 'PLEASE READ THE FOLLOWING LICENSE AGREEMENT TERMS AND CONDITIONS CAREFULLY...'. At the bottom, there is a checkbox labeled 'I accept the terms in the license agreement' which is checked. Navigation buttons '< Back', 'Next >', and 'Cancel' are at the bottom right.

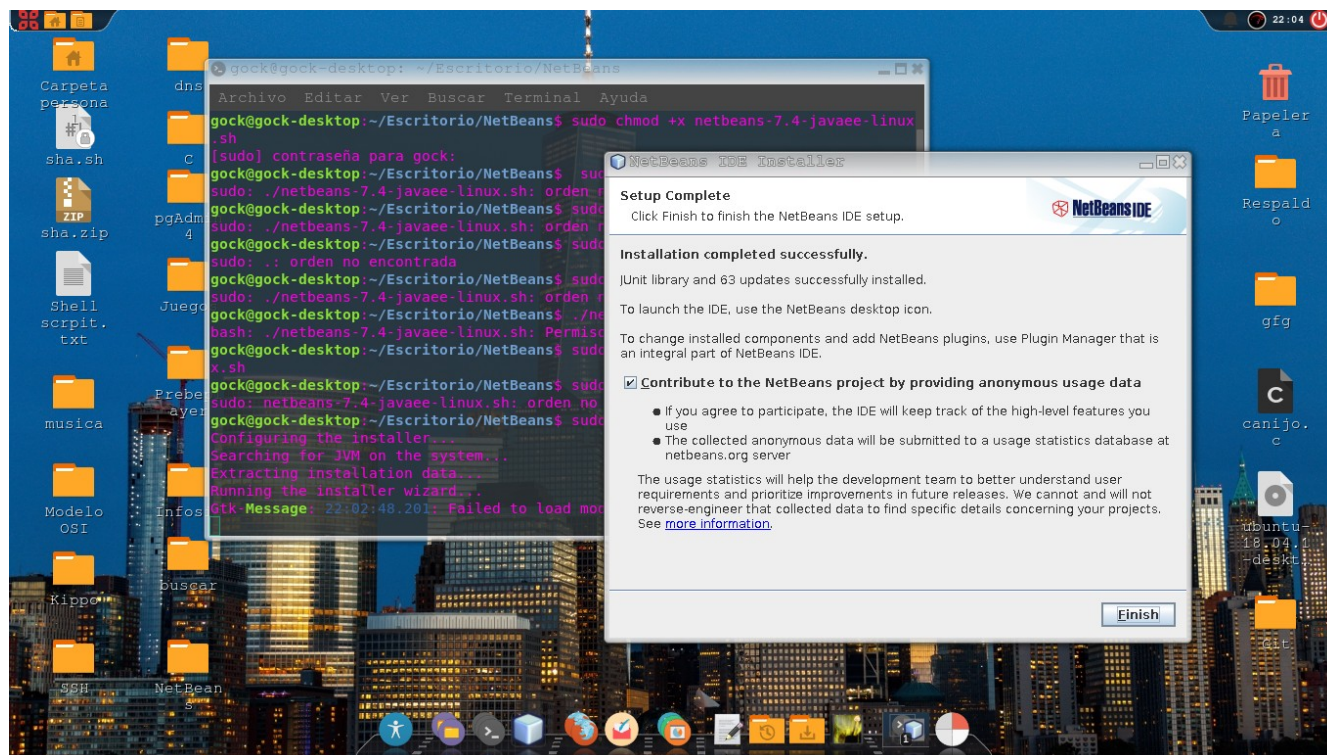

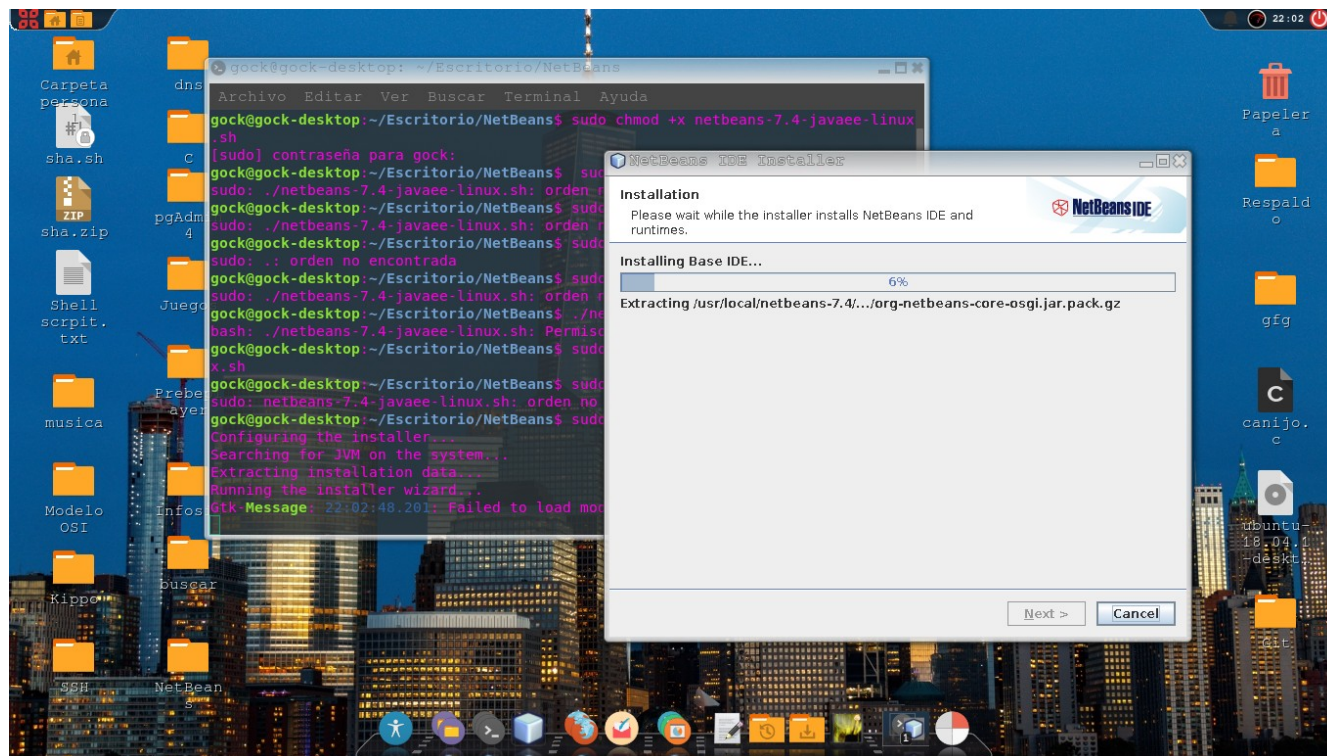

- [illegible]

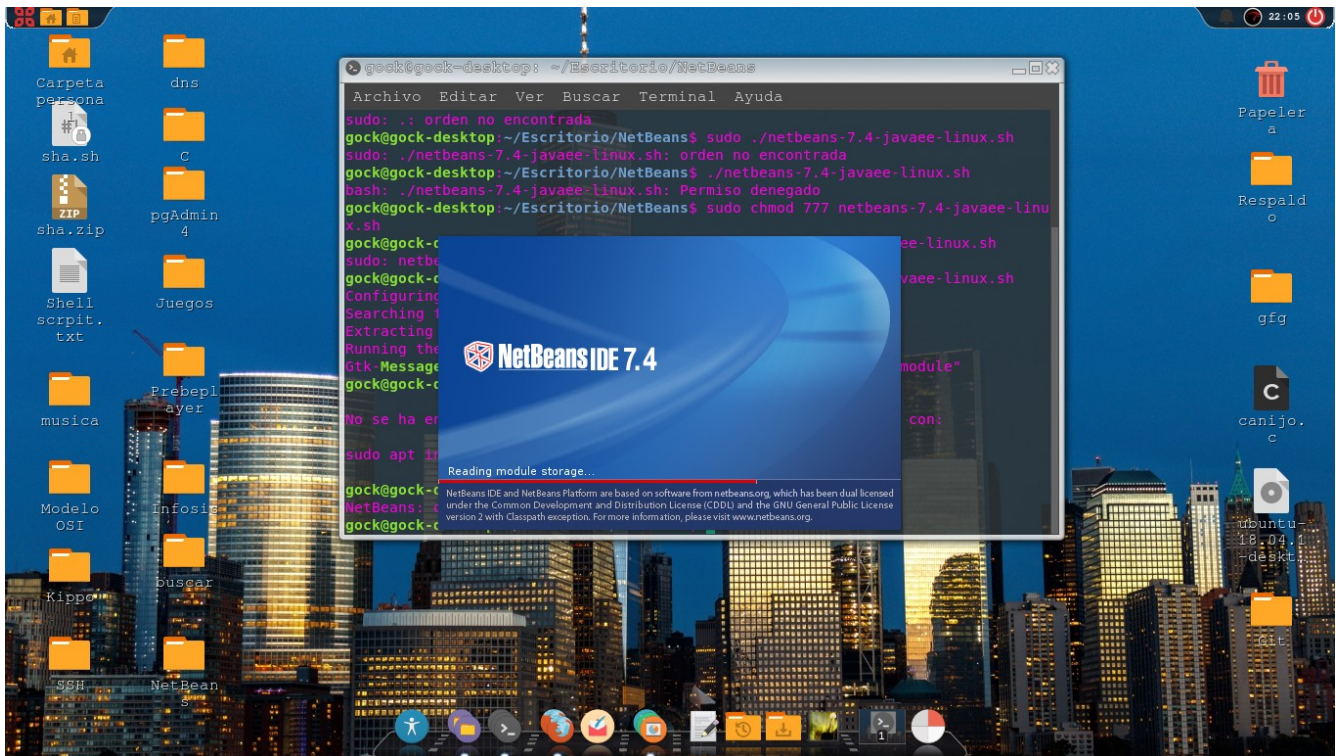

5. Luego damos install.

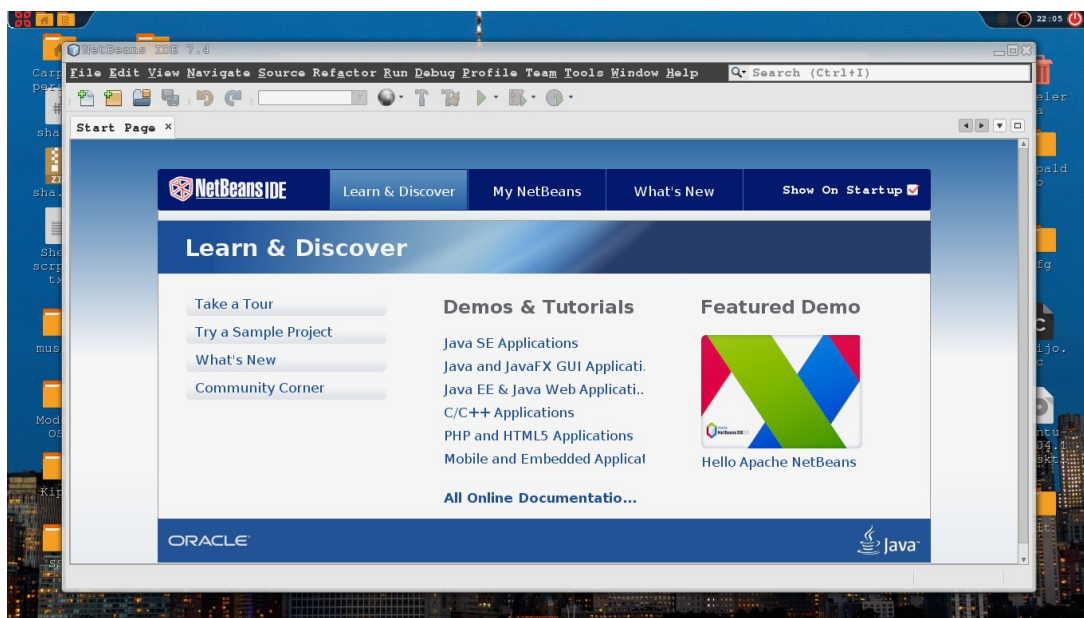

6. Comenzara la instalación y cuando termine le damos finalizar.

7. Y para abrir NetBeans solo buscamos Netbeans en Aplicaciones y le damos click

Y listo
hemos

terminado!
